PROFESSIONAL SUMMARY

Aspiring Software Engineer with a strong foundation in Python, SQL, object-oriented programming, and full-stack web development, complemented by a growing passion for machine learning and artificial intelligence. Passionate about solving real-world problems through clean, efficient, and scalable software solutions while continuously learning modern technologies. Eager to begin my career in a collaborative environment where I can contribute to impactful projects, expand my backend development expertise, and grow as a software engineer

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, JavaScript
- **Web Technologies:** HTML, CSS, Bootstrap, Flask, REST APIs,
- **Databases:** MySQL, SQLite
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms
- **Tools:** Git, GitHub, Canva, Excel, VS Code
- **AI & Automation:** Prompt Engineering, N8N (Workflow Automation), Meta Llama 3.1

PROJECTS

1. Recruit AI: Autonomous Recruitment Intelligence Pipeline

Tech Stack: Python, Flask, n8n, Meta-Llama 3.1, MySQL, Tailwind CSS, Discord Webhooks

- Built an autonomous n8n pipeline to process and classify recruitment emails, extracting structured job data in real time.
- Designed a dual-agent AI workflow using Meta-Llama 3.1 with prompt engineering to filter spam and identify key job entities accurately.
- Integrated a normalized MySQL backend with a Flask/Tailwind dashboard and Discord webhooks for live monitoring and tracking.

2. Card Fraud Detection System (Final Year Team Project)

Tech Stack : Python, scikit-learn, TensorFlow, pandas, NumPy

- Developed a machine learning system using Python, scikit-learn, and TensorFlow to identify fraudulent credit card transactions.
- Preprocessed transaction datasets using pandas and NumPy, handling data imbalances and feature engineering.
- Trained and compared Logistic Regression, Random Forest, SVM, and Neural Networks to optimize precision-recall metrics.

EXPERIENCE

Full Stack Development Intern | Retech Solutions **June 2024**

- Gained hands-on experience in full-stack development cycles, web application deployment, and hosting fundamentals.
- Assisted in configuring domains and managing communication protocols between frontend and backend systems.
- Acquired practical exposure to server deployment processes, basic networking concepts, and version control workflows.

EDUCATION

Jerusalem College of Engineering **2022 – 2026**
B.E Computer Science Engineering
Cumulative Grade Point Average : 8.68

Prince Matriculation Higher Secondary School **2022**
Higher Secondary Certificate
Percentage : 81%

ADDITIONAL INFORMATION

Certifications:
- Full Stack Python Development Internship Certification (Retech Solutions)
- Artificial Intelligence MasterClass (30 Days) – NoviTech R&D Private Limited **2026**
